The "Time Difference" category compares the best time a swimmer or relay has recorded in an event, to the time recorded at the specific meet. A negative sign in front of the time would indicate a decrease in time and therefore an improvement in that event. If no time difference is indicated, it is the first time the swimmer participated in the event. The swimmers on relay teams often change, so there is no time difference posted for them either. The events are listed in the order in which they were performed.
